SCAN TENT   Scan With Your Phone
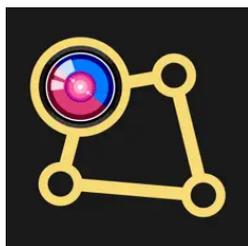

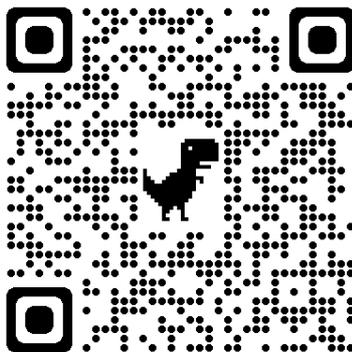

Install the app to your smartphone

 For iPhone: DocScan app - use the QR code or search the App Store

 For Android OS smartphones: DocScan app - use the QR code or search the Google Play store
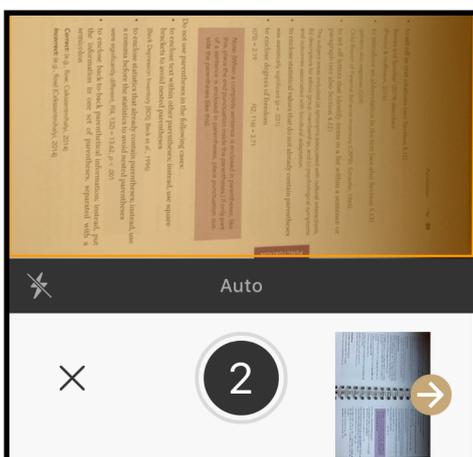

2. Place the phone on the tent top

   - the lens facing down of course :-)

   Put the document (book) to the tent centre
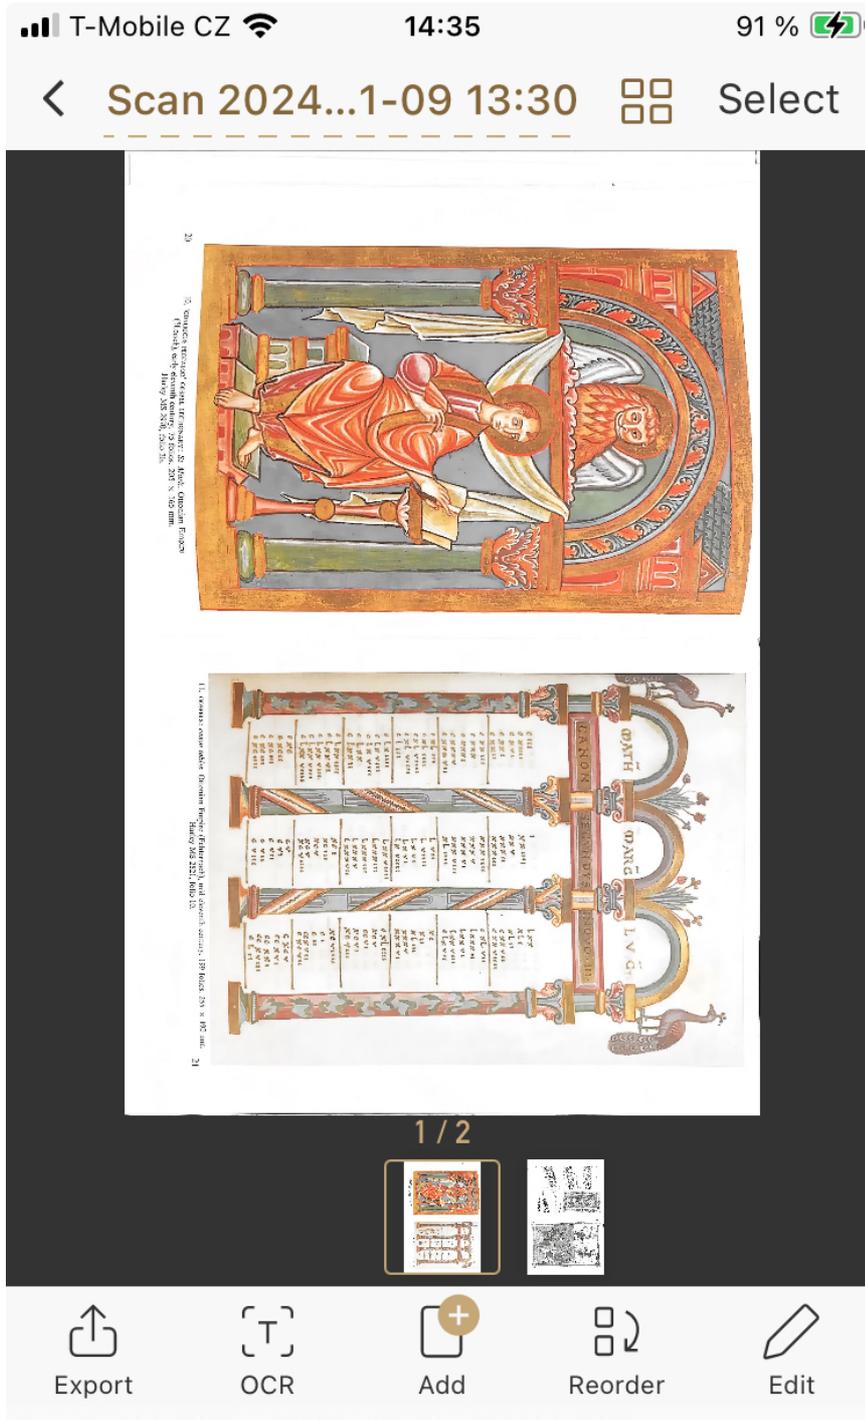

If the LED light is off plug the USB cable to a computer or a charger

Start the app and select AUTO mode if you intent to scan more than one page - the app records an image every time the page is turned

3. Scanned pages are stored in the app folders.

Basic edit can be done within the application (e.g. crop) and then the files can be exported.
